

Readiness for Scale Tool			
Alignment with Scale-Up Model	Question/Prompt	Strongly Disagree to Strongly Agree (1-5)	Alignment with WSL Values, Execution Model
Next Phase of Scale-Up	We have a set of best practices or tested change ideas that are ready to test or spread to the sites of the next phase of work.	1	Ideas
	We have a compelling theory of change.	2	
	We can show the evidence base for our theory from previous studies and/or we have results that show how the theory has been applied to our own improvement work.	3	
	If we are testing scale or going to full scale, improvement has been sustained in the sites where we are currently testing an implementation plan.	4	
	We have identified test/implementation sites most likely to adopt a new approach for the next phase of the plan.	5	
	<b>TOTAL Next Phase of Scale-up Score</b>	<b>22</b>	
Adoption Mechanism	Compared to other programs and initiatives, the community that we are planning to scale up into <b>adapts</b> community needs, the measurement initiative as a test initiative.	1	Will
	The adaptor community shares a sense of urgency in closing the gap in performance or outcomes <b>across our mission</b> .	2	
	The adaptor community/organization recognizes the benefits of participating in this improvement initiative.	3	
	The adaptor community believes the approach we are advocating will reach our goals faster related to other initiatives.	4	
	The adaptor community understands that the approach we are advocating is simple to understand, easy to try out and easy to measure.	5	
	The improvement approach we are advocating aligns with the culture and values of our community/organization.	6	
Support Systems	Leaders and champions of the adaptor community have been identified and have shown a willingness to advocate for the improvement initiative in their community.	7	Execution
	<b>TOTAL Adoption Mechanism Score</b>	<b>29</b>	
	Adaptor has met capacity (financial, dedicated time, territory) is available to support the scale-up of improvement across the community/organization.	1	
	Adaptable improvement capability exists to support the demand work of the next phase.	2	
	Capability exists to measure and monitor to facilitate the changes required for improvement.	3	
	Health and care workers across our community/organization see improvement and scale-up work as an integral part of their daily work.	4	
Support Systems	Data collection and reporting tools are available for scale up.	5	Execution
	Other organizational resources are well positioned to undertake this work.	6	
	A learning system exists to spread knowledge from improvement initiatives systematically across the organization, i.e. learning system has been quality planning.	7	
	<b>TOTAL Support System Score</b>	<b>23</b>	
	Adoption Mechanism Score	22	
	Phase of Scale-Up Score	22	
	Support Systems Score	23	
	<b>Overall Score</b>	<b>68</b>
